ISSF 3-POSITION RIFLE SHOOTING

ISSF 3POS is a 50-meter 22 LR rimfire rifle discipline fired from three positions: kneeling, prone, and standing. A standard Olympic match consists of 60 shots within a strict time limit, demanding extreme precision, consistency, and physical endurance. With a 10-ring measuring just 10.4 mm at 50 meters, the discipline places the highest w on both shooter and equipment.

To perform at this level, the rifle must deliver exceptional accuracy, absolute reliability, and full adjustability to maintain optimal posture and sight picture across all three positions. Purpose-built for ISSF 3-position competition, the CZ 457 TARGET delivers the accuracy, adjustability, and reliability required at the highest level.

CZ 457 TARGET

Main features

FLYWEIGHT TRIGGER

The CZ 457 TARGET features the lightest CZ 457 trigger mechanism to date, factory-set to approximately 110 grams. The fully adjustable two-stage trigger allows fine-tuning of first- and second-stage travel, sear engagement, trigger pull weight, overtravel, and trigger blade angle and reach.

The reworked firing pin ensures a smooth and crisp trigger function. The trigger kit is backward-compatible with existing CZ 457 rifles and accepts Anschütz trigger blades.

PROVEN AND RELIABLE SYSTEM

The CZ 457 TARGET features a further improved CZ 457 action with an adjustable single-shot loading system. A straight extended bolt handle with an enlarged, checkered aluminum CZ 600 RANGE-style bolt knob ensures smooth and natural reloading.

THE CHEEKPIECE

The CZ 457 TARGET stock features a three-axis-adjustable, two-sided cheekpiece with a different shape on each side for optimal cheek weld.

THE PISTOL GRIP

The CZ 457 TARGET features a three-axis-adjustable pistol grip, available in three different sizes. It allows precise fitting to the shooter's hand, ensuring maximum comfort and a firm, consistent grip.

LONGER MATCH BARREL

The CZ 457 TARGET features a new 26-inch MATCH barrel with 12 grooves and a target crown for maximum precision. The cold hammer-forged barrel is equipped with a diffuser with an 11 mm dovetail for mounting a front sight and additional weights. Guaranteed accuracy reaches a dispersion of 12 mm at 50 m (10-shot group).

THE BUTTSTOCK

The CZ 457 TARGET is paired with a side-tiltable buttstock featuring a five-axis-adjustable buttpad. A three-segment shoulder hook, adjustable for shape and tilt, provides enhanced stability and precise fit.

THE FOREHAND RISER

The CZ 457 TARGET forehand riser is adjustable in three axes, allowing precise and comfortable positioning of the rifle in the supporting hand.

NEW

CZ 457 TARGET

CZ 457 RIFLES ARE KNOWN FOR THEIR SUPERB ACCURACY.

The CZ 457 TARGET is a purpose-built rimfire rifle designed for ISSF competition. Building on the proven accuracy of the CZ 457 MATCH platform, it raises performance even further with a competition-ready aluminum chassis co-developed with Olympic champion Matt Emmons.

Fully adjustable ergonomics allow the rifle to be precisely tailored to the shooter, while support for competition accessories—including interchangeable pistol grips, diopter sights, and training devices—makes the CZ 457 TARGET a versatile tool for both training and match shooting.

The diopter sights are not included in the standard package.
